Exhibit A. Origin and Breeding History of the Variety

Soybean Variety 92B61 (May, 1997)

Variety 92B61 evolved from a cross of Pioneer variety 9241 x 30367. 30367 was an Rps1K BC4 F1 of Pioneer variety 9273.

It is an F4-derived variety which was advanced to the F4 generation by modified bulk descent. The F5 progeny row of 92B61 was grown in Iowa during the summer of 1992. Subsequently, 92B61 has undergone four years of extensive testing and purification and has been observed by the breeder to be uniform and stable for all plant traits from generation to generation, with no evidence of variants. On the basis of high yield and *Phytophthora* resistance 92B61 was advanced to commercial status.

The breeder seed purification block of 92B61 was produced during the summer of 1994 and 15 sublines were bulked for increase. One-half acre of 92B61 (breeders seed) was grown in Chile during the winter of 1994. 21 acres of parent seedstock (foundation seed equivalent) were grown during the summer of 1995. 350 acres of parent seedstock were grown during the summer of 1996.

Exhibit B. Statement of Distinctness

Soybean Variety 92B61

Variety 92B61 is most similar to variety 9281. Both varieties have purple flowers, tawny pubescence and yellow seeds with black hilum. However, 92B61 has isozyme profiles for AC02 and IDH2 of 2, whereas 9281 has isozyme profiles for AC02 and IDH2 of 1. (See Table 1.)

Exhibit D. Additional Description of the Variety

Soybean Variety 92B61

In Exhibit C we have identified variety 92B61 as susceptible to bacterial blight, brown spot, pod and stem blight, rhizoctonia root rot, bud blight, yellow mosaic, cowpea mosaic, pod mottle and seed mottle.

This does not mean that variety 92B61 is any worse for these problems than other varieties of similar maturity. Rather, we do not consider 92B61 to be immune to these problems. Therefore, we have chosen to be conservative and have identified the line as "susceptible".

Table 1. Isozyme Data

	AC02	AC03	AC04	ACP	DIA	ENP	IDH1	IDH2	MDH	MPI	PGM	$_{ m PHI}$
92B61	2	1	1	$\bf A$	\mathbf{B}	Α	1	2	В	\mathbf{A}	1	1
9281	1	1	1	\mathbf{A}	${f B}$	\mathbf{A}	1	1	\mathbf{B}	\mathbf{A}	1	1

92B61 is a mid group II variety. If group II maturities are divided in tenths, the relative maturity for 92B61 is 2.6.

U.S. DEPARTMENT OF AGRICULTURE AGRICULTURAL MARKETING SERVICE	_	The following statements are made in accordance with the Privacy Act of 1974 (5 U.S.C. 552a) and the Paperwork Reduction Act (PRA) of 1995. Application is required in order to determine if a plant variety protection certificate is to be issued (7 U.S.C. 2421). Information is held confidential until certificate is Issued (7 U.S.C. 2426).				
EXHIBIT E STATEMENT OF THE BASIS OF OWNERSHIP	certificate is to be issued (7 U.S.C. 24

11. Additional explanation on ownership (If needed, use reverse for extra specific	ace):	-				
PLEASE NOTE:						

Plant variety protection can be afforded only to owners (not licensees) who meet one of the following criteria:

- 1. If the rights to the variety-are-owned-by-the-original-breeder, that person must be a U.S. national, national of a UPOV member country, or national of a country which affords similar protection to nationals of the U.S. for the same genus and species.
- 2. If the rights to the variety are owned by the company which employed the original breeder(s), the company must be U.S. based, owned by nationals of a UPOV member country, or owned by nationals of a country which affords similar protection to nationals of the U.S. for the same genus and species.
- 3. If the applicant is an owner who is not the original owner, both the original owner and the applicant must meet one of the above criteria.

The original breeder/owner may be the individual or company who directed final breeding. See Section 41(a)(2) of the Plant Variety Protection Act for definition.

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0581-0055. The time required to complete this information collection is estimated to average 10 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

The U.S. Department of Agriculture (USDA) prohibits discrimination in its programs on the basis of race, color, national origin, sex, religion, age, disability, political beliefs, and marital or familial status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (braille, large print, audiotape, etc.) should contact the USDA Office of Communications at (202) 720-5881 (voice) or (202) 720-7808 (TDD).

To file a complaint, write the Secretary of Agriculture, U.S. Department of Agriculture, Washington, D.C. 20250, or call 1-800-245-6340 (voice) or (202) 720-1127 (TDD). USDA is an equal employment opportunity employer.
